Introduction

Although, there are many financial accounting software on the shelf today, but companies are desperate to alleviate the complications associated with implementing and utilizing most of this software, within their operational structure. However, through **FinMan 1.0** such bottlenecks are traded off with advancement in the design algorithms, to deliver bespoke and seamless accounting solution.

Why Choose FinMan?

One of the key components of a good manager is, accountability. Of course, accountability requires being meticulous – that is, giving attention to details. The FinMan has evolved through in-depth criticisms and supports from professional accountants with years of field experiences. Therefore, you would prefer FinMan for the following reasons:

- Data Integrity
- Data Accuracy
- Data Security
- Robustness
- Seamless Operations
- 100% Service Availability
- User Friendliness
- One Time License
- Flexibility, etc.

Deployment Process and Schedule

The FinMan 1.0 development and deployment takes minimum of 60 days, while training takes another 30 days.

Bill of Quantities for each Module

Sn	Description	Qty	Unit	Rate (N)	Price (N)
1	Cash Pay Office	1		500,000.00	500,000.00
